## Objective

---

Hard working and highly motivated Computer Science User Experience/User Interface student at Maryville University, dedicated to pursuing a summer internship to further programming knowledge and design skills in a professional, real-world setting.

## Education

---

Maryville University	May 2027
Computer Science Bachelor's Degree	GPA: 4.0
<ul style="list-style-type: none"><li>Coursework: Python Programming, C++ Programming, Java Programming, Discrete Math, Introduction to Digital Media, Database Applications</li></ul>	
Notre Dame High School	May 2023
High School Diploma	GPA: 4.0

## Experience

---

<b>Maryville University</b>	August 2023 – Present
<i>Student Success Front Desk Attendant</i>	
<ul style="list-style-type: none"><li>Strong verbal and written communication skills for writing emails and answering inquiries.</li><li>Attention to detail in handling paperwork.</li><li>Excels in a variety of tasks and open to learning new things.</li></ul>	
<b>Panera Bread Company</b>	February 2023 — Present
<i>Cashier</i>	
<ul style="list-style-type: none"><li>Flexibility while thriving in a fast-paced work environment.</li><li>Offers support to team members with effective communication and collaborative skills.</li><li>Cultivates an inviting and warm environment for customers.</li></ul>	

## Projects

---

### Personal Website - <https://isabellak5.github.io/Key.github.io/>

- Developed an interactive website using HTML, CSS, and JavaScript, further expanding my knowledge in front end development.
- Applied creative design principles to ensure an engaging user experience as they browse through personal projects and accomplishments.
- Hosted the website on GitHub, learning various Git commands and improving file management techniques.

### Mobile Order App Redesign

- Identified errors in a widely used mobile app and developed engaging solutions from start to finish.
- Conducted an online survey to gather user feedback on specific areas for app improvements.
- Utilized Figma to construct digital wireframes and prototypes, illustrating the ideal app design.

### Lost and Found Application

- Collaborated with a hackathon team of four to create an online application for students to report lost and found items.
- Created detailed wireframes to better communicate the website's design and functionality to the coding team.
- Gained valuable insights on addressing technological challenges while developing an efficient application within a tight deadline.

## Skills

---

- HTML, CSS, Figma, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Python, C++, Java, Visual Studio Code, Google Workspace Platforms, Microsoft Office Platforms
